**DELEGATIONS**

**Kim Charlebois – Sexual Assault Center for Quinte & District**

- Attended Council to give an overview of their mandate and services
- They are currently undertaking a \$1,000,000 capital campaign
- The Centre has served Hastings and Prince Edward for the past 20 years through Belleville and many satellite offices
- They provide counseling to victims of sexual violence
- The capital campaign is to secure moneys to build a residential healing centre to support a one week intensive residential healing program to support the counseling initiative
- They are looking at a rural setting to maintain confidentiality and be in an environment conducive to spiritual healing
- The group is primarily funded through the LHIN and Ministry of Community Services
- The capital campaign goal is about half met with a large contribution from the Parrot Foundation
- There is about \$500,000 yet to be raised
- The Centre currently supports 70 persons with and additional 81 on the waiting list
- The average treatment period is approximately 13 months
- The Council thanked Ms Charlebois for her presentation and fine work of this important group who serves our community

**TOWNSHIP OF TYENDINAGA**  
**Minutes of the Regular Council Meeting - NO. 2011-01**

**Alf Chaiton – Milltown Power Project**

- Attended Council with Jake Dupuis
- Mr. John Hill was an invited member of the gallery who has expressed concern regarding low water levels upstream from the Milltown Dam
- Mr. Chaiton provided an overview of the project slated for the west side of the Milltown Dam
- The project would involve using the flow area where the old mill was situated
- The project is designed as “run of the river” whereby the power generator (turbine) takes what the river gives at any given time
- There are no plans at this time to increase damming of the river to create a higher upstream head
- However, there are plans to install a temporary coffer dam so the identified area can be dried out for a few days so that engineering can determine the scope of work required to install the two 60 kilowatt units
- The proponents agreed that yes, higher water levels are desirable for greater power generation but their plans are to not artificially manipulate levels upstream or downstream
- No work has been done in 2010, a little in 2009 and preliminary work was conducted in 2008
- There was a long discussion about water levels and the technologies involved
- The group indicated that it was the Beaver Lake Cottagers Association who do most of the water level manipulation to protect higher water levels in Beaver Lake in late summer to support cottager recreation
- This leads to lower levels downstream
- There was a long discussion regarding the approval processes and the regulatory regime involved in a project of this nature
- It is Quinte Conservation and the Ministry of Natural Resources who are the legislated authorities in regards to most of the approvals required
- The Ministry of Environment and Federal Department of Fisheries and Oceans is also involved
- Council wishes to recognize the concerns from ratepayers upstream who are concerned about dry wells upstream during low water periods
- The group felt that if we and concerned ratepayers were to contact Quinte Conservation there could be pressure exerted so that the temporary dams and stop blocking be made more permanent to protect upstream water levels
- Our new Quinte Conservation representative, Iain Gardiner, will be following up on this notion as a Member of the QC Board
